

Nominating for a seat around the Council table hasn't been a decision made lightly.

I was successful in the 2021 election and wish to continue my work in enhancing our city amenities, fast tracking our housing land availability so we can grow our "live, work and play" City aspect. Being accountable is paramount and being transparent in all council business areas nonnegotiable.

Our city needs councillors that "think outside the box", are prepared with knowledge, are not elected with a single vision, but that look at all aspects of our community and treat these with the same priority.

I believe I can do this in a collaborative, positive manner, engaging all our residents, businesses, and industry.

Housing availability must be looked at. I would like to see the immediate release of available council land opening new land lots for affordable housing and smaller industrial lots.

FIFO is a short-term solution to bed availability for our mining and resources growth. Our city needs to benefit from the establishment of camps. We can use the funds raised to put back into our city's needed amenities, our sporting clubs, our aged care programmes, a trust fund established that gives us future funds to use within our community.

We need more water storage (more than 400mglitres) to ensure our wastewater obligations are met and our "Green City" image is maintained. We all remember the restrictions earlier this year. Decisions need to be made carefully, with our city residents the priority.

Boulder needs a face lift. I will bring to the council table, plans that will see Boulder CBD, roads, kerbs and footpaths get immediate attention. Boulder isn't forgotten.

I support the Kalgoorlie Boulder Community Fair, and the revitalization of Cruickshanks SA.

Working behind the scenes is a strength of mine, engaging the right people and consulting with all community members nonnegotiable. Delivering outcomes, a must.

My personal measurable values are.

Leadership, Performance, Decisions and Support
