

As someone who is a true local, having lived & raised a family here, whilst contributing to various community, sporting & charitable groups, I believe in our community & there is no better place for opportunity than Kalgoorlie-Boulder & together we should be able to achieve much.

Kalgoorlie-Boulder gives us many opportunities to get a good start in life, but like anywhere it can be better and that's why people put their hands up to be a Councillor, to make the community better.

I will be open minded, independent & impartial considering all matters than come before council to make our city a better place to work & live in.

To serve your community & make decisions on their behalf is a privilege & one to be taken seriously. It means being brave enough to speak up but also listen to other views, opinions and needs. To work as part of a collective on council to achieve positive outcomes for all.

I appreciate the importance of community and people and will work to empower that community & those people to be valued & have a voice. I believe council can do better to communicate with its residents & I will work hard to make sure our community feels a better part of the decision making on council & feels better informed on council decisions. Communication is a key part of improving better function of our council.

As diverse community with opportunities in mining and industry, council needs to work for & with the community to achieve better outcomes & sustainable growth whilst engaging with stakeholders & residents. With the economic output of Kalgoorlie-Boulder we deserve better as a community and I will advocate for that.

Council must be collaborative whilst embracing not only economic opportunities but social issues as well, improving facilities, liveability & safety for families whilst also ensuring council operates its core business & that is being for the community, its ratepayers & residents.

I believe in Kalgoorlie-Boulder, its people & want to make a difference for you.
